Sachin Sarawgi

My area of expertise lies in working with Spring Boot framework. Furthermore, I heavily rely on Kafka to manage queue events and asynchronous calls. I also have experience working with Elasticsearch and Redis, where I utilize them for optimizing search functionality.

WORK EXPERIENCE

Paytm, Hyderabad — *Engineering Manager*

May 2023 - PRESENT

At Paytm, my tenure as Engineering Manager has revolved around spearheading critical data migrations and API deployments, ensuring uninterrupted user experiences. Our team's dedication to innovation is reflected in the seamless integration of over 20 GB of user PSP binding data. With a strong command of Java, Spring Boot, Redis, Kafka, MySQL, Microservices, AWS, Prometheus, Grafana, and Shell Scripting, I've contributed to maintaining and elevating Paytm's service quality.

The leadership role has further honed my project management skills, allowing me to distribute tasks and manage team dynamics effectively.

Threado, Hyderabad — *Lead Software Engineer*

September 2022 - April 2023

As the lead developer for Threado's Outreach module, I managed its development and functionality, creating a central hub for communication across Slack, Discord, Discourse, and Email. I developed a parser for the EditorJS plugin to enable seamless messaging across platforms and managed image storage in S3. Additionally, I oversaw database design for optimal performance and provided timely support to resolve customer issues, ensuring smooth team collaboration.

ServiceNow, Hyderabad — *Independent Contributor 3*

Nov 2019 - Sept 2022

Worked on ITBM and DevOps verticals in the ServiceNow platform. For ITBM, I integrated Azure and Jira with ServiceNow, developed integration apps available in the store, and contributed to the ServiceNow Agile Development 2.0 plugin. I also addressed security issues using Fortify. In DevOps, I worked on playbook and performance analytics plugins to design dashboards, portals with UI Builder, and custom widgets using Terraform.

Technologies

Spring Boot, Microservices, REST API, Kafka, Redis, MySQL, AWS, Unit & Integration Testing, Elasticsearch

Extra Achievements

TCS Start of the Leaner Group Award (given in ILP to the best performer)

Gems for filing papers in the conference.

Education

West Bengal University of Technology

Apr 2010 - Mar 2014

BTech in ECE
GPA: 9.04
Student of the Year award in college, given depending on 4-year performance.

Paysafe, Hyderabad — *Platform Engineer*

Dec 2018 - Sep 2019

My primary responsibility was to extract insights from customer transactions using MapR Stream, Spring Boot, Spring Cloud, ElasticSearch, and Druid databases. I managed heavy transaction loads for seamless processing.

Accion Labs, Hyderabad — *Senior Software Engineer*

Mar 2017 - Nov 2018

Developed REST APIs and microservices using Spring Boot, Spring Cloud, JPA with Hibernate, and PostgreSQL/ElasticSearch databases.

TCS Innovation Labs, Mumbai — *Software Engineer*

Sept 2014 - Mar 2017

I utilize Spring MVC and Hibernate for web app development and follow a comprehensive SDLC process to ensure security.
